### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claim 23. (Amended) The insect control station as in claim 14 [22], wherein said mechanism is a killing mechanism comprising an eradication mechanism positioned proximate to or within the attractant zone.

2. The following is an examiner's statement of reasons for allowance:

In regard to claim 1, the prior art of record does not disclose an insect control station comprising a gluey surface supported on the control station.

In regard to claim 7, the prior art of record does not disclose an insect control station comprising a pesticide supported on the control station.

In regard to claim 9, the prior art of record does not disclose an insect control station comprising a gluey surface supported on the control station.

In regard to claim 11, the prior art of record does not disclose an insect control station comprising a pesticide supported on the control station.

In regard to claim 13, the prior art of record does not disclose an insect control station comprising a source of negative pressure connected to the tubing, the control station having an inlet proximate the resonator sized to receive insects that are drawn through the inlet in response to negative pressure.

In regard to claim 14, the prior art of record does not disclose an insect control station comprising the eradication mechanism includes a detector to detect the presence of an insect within the attractant zone, the eradication mechanism being activated in response to detection of the insect.

In regard to claim 16, the prior art of record does not disclose an insect control station comprising a source of negative pressure connected to the tubing, the control station having an inlet proximate the resonator sized to receive insects that are drawn through the inlet in response to negative pressure.

In regard to claim 31, the prior art of record does not disclose an insect control station comprising the tubing having air intake holes and air outflow holes, the control station further comprising an element positioned within the tubing that produces heat in response to the passage of current therethrough, the air intake holes and air outflow holes being arranged relative to the heat-producing element to establish convection currents of heated air when heat is being produced by the heat-producing element.

In regard to claim 37, the prior art of record does not disclose an insect control station comprising a source of negative pressure connected to the tubing, the control station having an inlet proximate the resonator sized to receive insects that are drawn through the inlet in response to negative pressure.

Art Unit: 3643

In regard to claim 45, the prior art of record does not disclose an insect control station comprising the tubing having air intake holes and air outflow holes, the control station further comprising an element positioned within the tubing that produces heat in response to the passage of current therethrough, the air intake holes and air outflow holes being arranged relative to the heat-producing element to establish convection currents of heated air when heat is being produced by the heat-producing element.

In regard to claim 48, the prior art of record does not disclose an insect control station comprising a gluey surface supported on the control station.

In regard to claim 61, the prior art of record does not disclose an insect control station comprising a pesticide supported on the control station.

In regard to claim 74, the prior art of record does not disclose an insect control station comprising the tubing having air intake holes and air outflow holes, the control station further comprising an element positioned within the tubing that produces heat in response to the passage of current therethrough, the air intake holes and air outflow holes being arranged relative to the heat-producing element to establish convection currents of heated air when heat is being produced by the heat-producing element.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
